

Refik Anadol

Refik is an artist who turns data into a immersive dreamlike world using AI trained on weather, brainwaves, and museum archives. He's opening up Dataland, which will be like a Disneyland for technology and artwork.

How does the world around him inspire Refik's artwork?

He collects data from the world—like weather, NASA images, sounds, or MRI brain scans—and turns it into swirling, colorful art that moves.

In what cool places around the world has Refik shown his AI art?

In museums like the MoMA, the Sphere, Disneyland, and even transmitted to outer space! His work lights up buildings and fills rooms with gorgeous shifting colors.

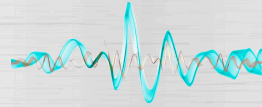

How has Refik used his AI art to help the world?

Through AI art sales, he raised over \$5 million for charities that help children and do medical research.

Create Data-Painted Art

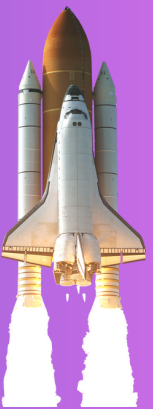

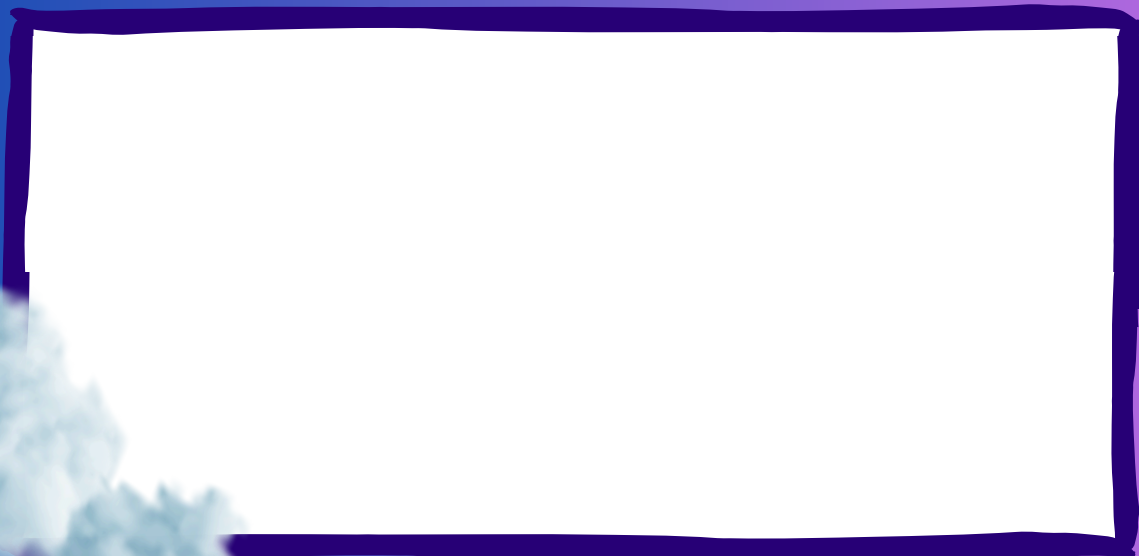

Pick one part of the world that you feel could be turned into art like Refik Anadol does. For example, weather, brainwaves, sound, NASA images and museum archives. Come up with a title and describe the concept.

Imagine if your art was shown like Refik's—projected on buildings, inside a spaceship, or in a museum.

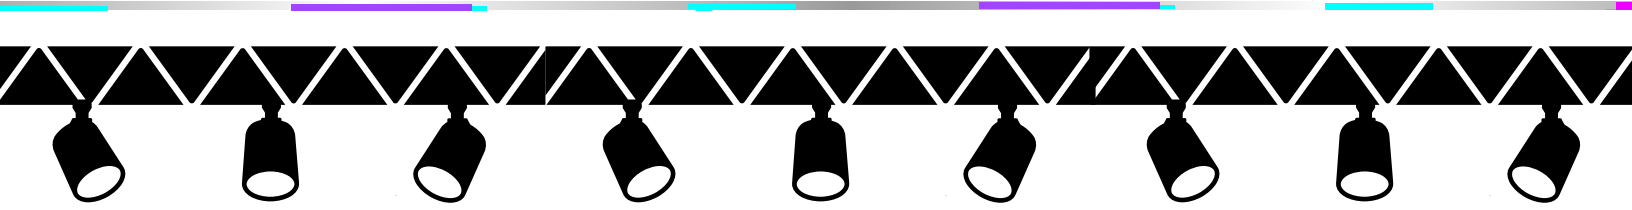

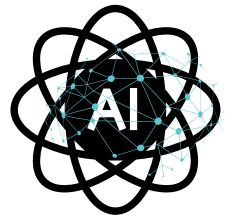

Art title	Artist name
	

My art moves like and feels like.

Cut out images, draw, and paint to create a visual representation of your idea. Take a snapshot of what you make and upload it to an AI like ChatGPT to make a visual representation of the idea.

AI and Film

AI is transforming the world of creativity in a similar way that animation transformed the last century. When Walt Disney grew up, he dreamt of becoming an illustrator. But at 19-years-old, he saw the new animation technology and decided that he had the even more ambitious goal of creating an animation studio.

If you love to create things, embracing the new AI technology can help you become an innovator of the future. You can start out by using image and video generation platforms to create an AI movie trailer you can screen for family, friends and classmates!

AI Movie Time Machine

Prompt: What if your favorite movie was made in the 1920s or 3020s? Ask AI to create a scene from that version!

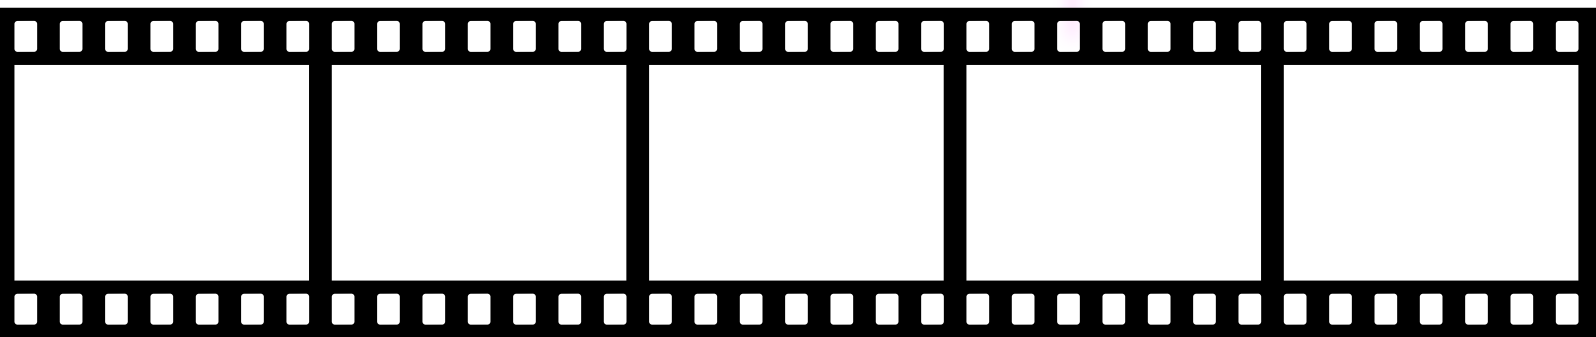

MISSION AI TRAILER

Step 1: Write a Short Script to capture the story. Here is a dramatic outline for an AI Innovator's story!

1. In a world where...
2. One young innovator has a dream...
3. But everything changes when...
4. Now the innovator must...
5. Before....

Brainstorm here

Step 2: Generate videos related to each scene through AI tools like Sora, Runway or Pika. If you just want to combine images, you can start with AI Images from ChatGPT or Midjourney.

Step 3: Turn the separate images or video clips Into a Video with AI Tools on Canva.

On Canva, search "video" > choose "Blank video"

Upload the images and videos you generated

Insert text boxes for your script

Add music (search for "trailer" under audio) or upload an AI generated music
then make an AI voiceover on Canva by going to audio, selecting AI Voice, and
typing in the script. Now, download the video and you're ready to share your

AI trailer! You are now an AI Film Producer.

On to the full movie!
